Extra well machine recleaned. Excellent quality.

	\$1.00	\$.90	\$.85	\$.80

(This is a new Winter and Spring clover that was offered commercially in 1939, for the first time. Lappacea has been tried for several years in this section on a variety of soils and has been carefully observed. The results as a pasture and hay plant have been outstanding. On Alabama's Black Belt Experiment Station, this clover has cut 17,000 pounds of green matter per acre. Plant 5 to 8 lbs. per acre. Use inoculation and phosphate. Every farmer will be well repaid to at least make a trial planting. Lappacea gives grazing about a month longer than most Spring clovers. The supply of seed is very limited. The purity of ours is unsurpassed. ORDER TODAY!
